Recommended Specification

As a regular user you will have a clear idea what type of media files you will wish to look at or listen to.

Micro hard disc MP3 players offer high capacity memory, a small form factor and lightness of weight. This makes them ideal as personal portable units for listening to extensive collections of music files whilst on the move. Their small screen sizes do allow photographs to be viewed, albeit usually on a 1.8 inch screen.

These MP3 units usually feature Lithium Ion in-built batteries that are charged via USB cables connected to computers. This can prove to be very inconvenient when travelling away from home or the office and the battery power runs out.
