Step 2 - Personal User

Recommended Specification

The ideal unit for your own personal use is very much dependent on how you mostly travel to your destinations and whether you wish to have a portable device with you at all times.

For car travel you should consider a dedicated Sat Nav unit for your vehicle. Please see the recommended specification below.

For a portable Sat Nav solution you should seriously consider a [Smartphone GPS Unit](#) due to its small size and the fact that you probably carry your phone nearly everywhere with you. However, this is an expensive option as you have to buy a bluetooth GPS receiver and often subscribe to a navigation package from your phone service provider. These units will also work in your vehicle as well.
