Step 2 - Business User

Recommended Specification

The ideal Sat Nav unit is very much dependent on how you are most likely to travel to your business meetings.

For high mileage car travel you should consider a dedicated Sat Nav unit for your vehicle. Please see the recommended specification below.

For a portable Sat Nav solution you should consider a [Smartphone GPS Unit](#) solution due to its small size and the fact you carry your business phone nearly everywhere with you. This solution also requires a portable bluetooth GPS receiver.

 [Print](#) a text only copy for when you go shopping.

 [Download](#) a Pdf version of this page to send to a friend
